

Gore Hill Oval Community Facility

Community & Council

Willoughby City Council proposed redeveloping Gore Hill Oval Park and sporting precinct. ATCO Structures supported project leaders Glascott Landscape and Civil to deliver a functional new modular facility as part of the redevelopment project.

Designed to suit the sloping terrain, the modular building was installed on a raised platform, facilitating accessible rear access while providing a raised platform to view the field. The 660 m² building included a multi-purpose room, male and female amenities and changerooms, accessible amenities, store rooms, and a commercial kitchen.

The building featured glass sliding doors and roof-to-floor windows to provide uninterrupted views of the sporting field from inside, along with covered walkways and a central covered open space for outside spectator shelter. Electric roller shutters were utilised to separate changerooms and provide room size flexibility.

ATCO completed manufacturing the facility in twelve weeks, with installation completed over the following four weeks, showcasing the fast turnaround of modular construction.

Snapshot

Location: St Leonards, NSW

Date: November 2018

Client: Glascott Landscape & Civil

End Client: Willoughby City Council

Features:

- » Multi-purpose room
- » Public bathroom amenities
- » Sport changing rooms
- » Commercial kitchen & servery
- » Accessible amenities
- » Referee amenities
