

# Hume City Council Community Facility

Community & Council

With the spirit and community of the local football club in mind, ATCO Structures designed and installed a 1000m<sup>2</sup> modular clubhouse and amenities solution for the Hume City Council.

The complex included amenities with change rooms and showers, referee amenities, public bathroom amenities, a commercial kitchen, a bar, and a dining room. ATCO provided a full turnkey solution utilising modern methods of construction to facilitate a time and cost-effective solution reducing impact on the site and enabling training and sport to continue throughout the construction. Services provided included permits, certification, design, civil works, installation, external construction, and all reticulations & connections.

The interior featured an aesthetically pleasing timber panel ceiling and brand-coloured carpet, along with floor-to-ceiling commercial glass windows to enhance natural lighting and enable uninterrupted views of the sports field. Contemporary exterior cladding in club colours invokes community ownership and enhances the exterior appeal.
