

Timbrell Park Community & Sports Facilities

Council & Community

The City of Canada Bay Council engaged ATCO Structures to demolish and replace their 1970's brick amenities building with a state-of-the-art modular building at Timbrell Park in Sydney's inner west.

Timbrell Park is utilised by sports clubs, the general community, fitness groups and individuals, schools, families, and council events. The purpose of upgrading this facility was to improve accessibility, enhance sustainability, and create a diverse space that suits the general public usage.

The project included a 325m² multipurpose building and a 170m² amenities building connected by common walkways and a community BBQ area. The architecturally designed building features various forms of exterior cladding and a curved ceiling to floor window.

The amenities building included change rooms, referee/adminstration rooms, first aid room, and a canteen with a commercial kitchen. While the multipurpose building consisted of a large sport storage room with roller door access, public toilets, and a large multipurpose room. New stairs, pathways, and wheelchair access ramps with tactile paving and landscaping (turf and gardens) were also included in the scope of works.

Snapshot

Location: Timbrell Park, NSW

Date: August 2023

Client: The City of Canada Bay

Features:

- » Change rooms with showers
- » Referee amenities
- » Public toilets
- » Commercial kitchen
