

# Tumut Aquatic Centre

Community & Council

ATCO Structures worked with Snowy Valleys Council to design, manufacture, and install a permanent modular aquatic centre adjacent to the Tumut War Memorial Olympic Swimming Pool in Tumut, NSW.

The 278.6 m<sup>2</sup> modular facility (measuring 9.9 m × 28.15 m) includes male and female toilets, showers, and change rooms, as well as fully accessible PWD toilets, showers, and change facilities. The building also accommodates first aid facilities, administration offices, a canteen with kiosk entry, and storage rooms, providing a comprehensive amenities solution for pool users.

The aquatic centre showcases contemporary architectural features, highlighted by a modern façade incorporating a statement phelmet, Colorbond® cladding, painted Scyon Matrix Panel, and orange louvre fins. The colours are continued throughout the interior, with vibrant accents in the bathrooms complementing a neutral, durable, easy-clean fit-out.

Energy efficiency was a key design consideration. To minimise cooling load requirements in the kiosk and administration areas, an air curtain was installed to retain conditioned air while maintaining smooth and convenient access to the building. Wheelchair-compliant ramps and accessible pathways have also been incorporated, ensuring the facility is inclusive and accessible for all users.

## Snapshot

**Location:** Tumut, NSW

**Date:** October 2020

**Client:** Snowy Valleys Council

### Features:

- » Entry & kiosk
- » Administration office
- » Public bathroom & changeroom amenities
- » PWD bathroom amenities
