## APLNG PERMANENT FACILITIES

*ATCO delivered a custom, aesthetically pleasing modular solution for the Permanent Operations and Maintenance Field Base.*

A custom, in-situ build aesthetic was achieved through architecturally designed external cladding combined with clerestory roof with an increased pitch which achieved utilising a separate roof truss system.

A pop up awning features over the central covered deck, providing space and comfort for project personnel.

## PROJECT FEATURES

- ❖ Manufacture, fit out, placement on client provided footings, and complexing were completed by ATCO.
- ❖ Over 400m<sup>2</sup> of modular space provided with a mixture of office, amenities and storage space.
- ❖ High end finishes selected including recessed LED lighting and spotted gum hardwood decking, complementing the architectural features and colours.
