

LANGWARRIN PRIMARY SCHOOL

ATCO was engaged by the Department to provide a turnkey solution for permanent modular classrooms and administration facilities. Concurrently addressing long and short term needs of the school, the challenging site required demolition and construction during school term without loss of learning spaces.

The scope included asbestos removal, demolition, permitting, certification, design, civil, fire services upgrades, installation, external construction, and all inground services reticulations.

ATCO simultaneously coordinated with relevant stakeholders to install decanting learning centres, whilst also delivering the permanent facilities.

PROJECT FEATURES

- ❖ Bright, open learning spaces - 6 classrooms, art room, covered external areas and amenities, and admin block including large staff commons rooms.
- ❖ Upgrade of mains fire services to school grounds.
- ❖ Seamless integration and into existing sports courts facilities.
- ❖ Selection of contemporary materials, module shapes and roof lines for street appeal.
