

REDLANDS SCHOOL

Working with Bloompark Consulting, ATCO completed the design, manufacture and installation of seven senior classrooms at Redlands School.

ATCO worked closely with the architect to deliver a façade that complimented the existing buildings at the preschool to Year 12 co-educational school.

The classrooms were delivered and installed with precision to ensure minimal disruption to the school environment.

PROJECT FEATURES

- ❖ All classrooms were manufactured, delivered and installed on site within six months of order placement.
- ❖ Classrooms were delivered on time, to budget and within the tight site parameters.
- ❖ Spacious interior to allow the inclusion of current schooling technology.
