# Modular Holiday Park Buildings

Nothing boosts your holiday park visitor numbers like high-quality facilities and amenities. ATCO modular holiday park buildings enable fast easy upgrades to your park as you need them, with limited onsite disruption.

Our modular buildings are designed and manufactured in Australia to Australian Building Standards, using sustainable materials and durable easy-clean fittings and surfaces. We offer a full turnkey service or DIY installation with prewired services for mechanical, plumbing, and electrical. Additional optional services include solar panels and air-conditioning.

We have a selection of pre-designed floorplans that can be further customised with external features to produce an architecturally aesthetic state-of-the-art building that blends in with the look and feel of your holiday park.

The ATCO holiday park modular building range includes:

- » Self-contained cabins
- » Multi-module dormitories
- » Canteens
- » Communal kitchens
- » Toilet blocks
- » Shower blocks
- » Laundry blocks
- » Administration offices
- » Security huts
- » Workshops
- » Reception
