

ATCO LNG CAPABILITIES

Wheatstone LNG Project, Onslow, Western Australia

ATCO Structures has extensive global experience constructing large and challenging camps across the globe. With over 75 years' experience with oil and gas projects, we have constructed LNG specific camps in some of the most remote locations and extreme climates in the world. We offer a reliable turnkey solution that includes:

- engineering and design,
- manufacturing and installations,
- construction and site services,
- facilities operations and maintenance
- turnkey catering and camp services.

ATCO[™]

SLEEPING SPACES

We know the importance of providing safe, reliable, and comfortable housing for your workforce while working away from home. From dormitories to private rooms with bathrooms ensuite, ATCO has the capability to design, manufacture and construct it all.

Depending on your needs, our sleeping accommodations can include ensuite bathrooms, Jack-and-Jill bathrooms, or shared bathrooms, and can be configured in single, double, or triple story configurations.

KITCHEN AND DINING

Our modern kitchen and dining modules are suitable for large person camps. Our diner units can include features such as self-serve stations, beverage bars and seating. Our mobile kitchens come in a variety of layouts with high-quality appliances. Features include self-contained water storage and pressure systems, stainless steel appliances, storage areas and top-quality furnishings.

RECREATIONAL FACILITIES

Recreational facilities are not luxuries, they are necessities. Providing access to entertainment and high-quality fitness facilities is essential to both your workforce's wellbeing and to you attracting the best people for your job. We can tailor recreational facilities to suit your needs including swimming pools, fitness centers, game rooms with pool tables, foosball, table tennis and golf simulators, TV lounges or movie theatres, outdoor running tracks and full-size gymnasiums with basketball, squash courts and soccer, cricket and rugby fields.

BLAST RESISTANT BUILDINGS

ATCO's blast resistant buildings provide security, safety and comfort for employees working in oil and gas areas where safety is a priority. Whether you need a control room, lunchroom, office, or storage space capable of withstanding the force of a blast incident, our blast resistant buildings are just one of the many solutions we offer. Utilizing proven and certified Hunter Buildings technology, we are fully equipped to meet your specifications.

TURNKEY CAMP MANAGEMENT FACILITIES

For nearly 75 years, we have supported remote worker housing with turnkey management services. We offer customized workforce housing solutions that meet the needs of your team wherever you are working. We can provide catering and food services, housekeeping and janitorial services, facility maintenance and management and administration.
